

## HEALTH, SAFETY AND ENVIRONMENTAL POLICY

We are engaged in “**Ship maintenance and repairs, Tank cleaning, Fabrication, Welding & Mechanical works**” and is committed to

- Strive for continual improvement by defining HSE objectives, targets and regular performance monitoring with an emphasis on environment and safety.
- Identify risks and significant impacts that may arise during the execution of the jobs and establish operational controls to reduce our environmental footprint, supporting global efforts that address climate-change-related risks and to eliminate the risks involved in environmental and occupational health & safety related activities.
- Lead our employees to communicate, participate and work as a team to develop a better working environment and industry practices.
- Comply with applicable statutory, regulatory and legal requirements related to the services provided by us.
- Serve the stakeholders by providing an environmental friendly atmosphere with an emphasis on health and safety aspects.
- Committed to implement an effective health, safety and environmental management system to prevent injury, ill health, environmental pollution and depletion of natural resources resulting from our work activities
